Production Sale

SATURDAY, NOVEMBER 13, 2021 - 1:00 PM

AT THE RANCH - BERRYVILLE, ARKANSAS

Disciplined Progress

SATURDAY, NOVEMBER 13, 2021 - 1:00 PM

AT THE RANCH - 99 CR 5015 - BERRYVILLE, ARKANSAS

SALE DAY CONTACTS:

Brock Smith(870) 480-6406
Matt Caldwell(913) 755-1105
Sara Schmitz(870) 423-7905

SALE MANAGER:

Matt Caldwell(913) 755-1105
mattcaldwell75@gmail.com

AUCTIONEER:

Justin B. Stout
(913) 645-5136

LIVESTOCK PUBLICATION REPRESENTATIVES:

Will Harsh, *Angus Journal*(740) 272-1386
Dakota Ferguson, *Oklahoma Cowman*(785) 893-1604
Guy Peverley, *The Stock Exchange*(785) 456-4390
Jesse Bolin, *Angus Beef Bulletin*(417) 830-2835

VIDEO/SALE FORMAT:

Videos of cattle will be available at smithregisteredangus.com.
Cattle will not be run through a sale ring. TV's will be set up on sale day with a video of the animal selling. All cattle will be conveniently penned at sale site for inspection.

INTERNET BIDDING:

Can't make the sale? Watch and bid online at LiveAuctions.tv. If you need assistance in setting up your account contact (817) 725-8595.

ACCOMMODATIONS:

Edelweiss Inn, Eureka Springs(479) 253-7316
Lookout Lodge, Eureka Springs(479) 253-9335
Fairfield Inn & Suites, Springdale(479) 419-5722
Hampton Inn, Harrison(870) 365-0505
Fairway Motor Inn, Berryville(870) 423-3395

TERMS OF SALE:

Terms of the sale are cash or check at settlement for your purchase. All cattle sell under the suggested Terms and Conditions of the American Angus Association (www.angus.org/pub/suggested_sale_terms.pdf). Cattle will not be released until settlement has been made. Registration papers will not be transferred until paid in full.

REGISTRATION CERTIFICATES:

Animals will be transferred to the buyer at the seller's expense. Each buyer must be sure to give the sale clerk proper name and address for making transfers.

TRUCKING:

Reputable truckers will be available to assist with your purchases. Let us know if you need assistance with your trucking needs.

PERFORMANCE INFORMATION & GENOMIC ENHANCED EPDS:

All bulls have Genomic Enhanced EPDs.
All bulls were DNA tested with AngusGS.
For more information please contact the ranch.
All EPD's current as of 10/02/2021.

SMITH BREEDING GUARANTEE:

Smith Registered Angus provides a first breeding season guarantee on all bulls selling. The breeding season is defined as the 90 day period following bull turnout. We will provide you a satisfactory replacement or issue a credit for a future sale equal to the purchase price minus salvage value. Smith Registered Angus Ranch reserves the right to deal with any problem individually.

INSPECTIONS OF THE CATTLE:

You are invited to inspect the cattle at the ranch anytime.

SMITH REGISTERED ANGUS RANCH HERD HEALTH:

All bulls selling have passed a semen evaluation by Brett Buchanan, Berryville Vet Clinic (417) 846-3508. Individual health papers will be provided for shipment anywhere.

NOTES:

Supplemental breeding and pregnancy testing information will be available sale day. Announcements made from the auction block will take precedence over the sale book. All persons attending the sale do so at their own risk. Neither the owners, nor the sale staff assume liability, legal or otherwise for accidents or loss of property.

Smith Registered Angus Ranch would like to welcome everyone to 6th Annual Fall Production Sale!

At Smith Angus Ranch, we've always had a strong belief in the values of faith, family, hard work, and personal responsibility. Those values are the cornerstone of our business and drive us to continuously improve from generation to generation. We've used that same concept in our black angus cattle operation.

Again this year we will be having the sale at our farm south of Berryville. We are excited to welcome you to our farm to view the cattle. The sale will be on video with TV's set up under the tent.

We have set our goal to provide genetics that will help our customers have success in the cattle business. Disciplined selection and the use of AI have allowed us to make huge strides in our breeding program. All of our bulls have been DNA tested and have genomic enhanced EPDs as a risk management tool for you.

The bulls have been developed on pasture with 5-7 pounds of a hand fed daily supplement. They are sound, good footed, and ready to work. We're confident these bulls, with their docility, phenotype, calving ease, and growth, to be an asset to any operation. Herd health and fertility checks have been done by Berryville Vet Clinic.

Strong relationships are at the heart of our operation, and we strive to always do the right thing, for the right reason, in the right way. We appreciate our previous customers and value your continued support. Please contact us with any questions, and let us know if we can assist you in selecting the right animal.

We sincerely thank you for your interest in Smith Registered Angus Ranch.

Sincerely,

The Smith Family

YOU'VE DONE THE WORK.

Get paid for it.

You've invested in good genetics.
You've kept all the records.

AngusLinkSM combines USDA Process Verified Programs with a Genetic Merit Scorecard that gives buyers confidence in your calves. From age and source verification to cattle care and handling, you choose which programs make the most sense for you.

**Group Age & Source • Angus-Sired Genetics
Non-Hormone Treated Cattle • NeverEver³
Cattle Care & Handling • Calf Management •
*Genetic Merit ScorecardSM**

**Optional, not part of the PVP claims*

Easy and affordable, our customer service representatives walk you through the process.

visit AngusLink.com for more information.

ANGUS. ONLY ANGUS.

There's only one DNA profile created specifically for Angus cattle.

Angus GSTM is the new standard in genetic testing for Angus cattle. Created by Angus Genetics, the profile is purely Angus DNA, so it will have better predictability and deliver more power and accuracy than any previous generation genomic enhanced EPD, and at a much greater value. Visit angus.org/agi for the test that only Angus Genetics could create.

FOR ANGUS. BY ANGUS.

ANGUSGS
Powered by Neogen GeneSeek

ANGUS GENETICS

American Angus Association Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

FOOT SCORE

Claw Set (Claw), is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal claw set, which is toes that are symmetrical, even and appropriately spaced.

Foot Angle (Angle), is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal foot angle, which is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass traits where the units of measure are in trait format and analyzed on an age-constant basis.

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Increased selection pressure on \$W increases weaning and maternal milk traits while increasing mature cow size.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase, and market these animals on a quality-based carcass grid.
